Integrated multi-omics analysis reveals Lactobacillus anti-inflammatory process in vaginal tissue

A demonstration of Rmarkdown using Herman Bumpus' data

Joint analysis of vaginal microbiome reveals distinct patient subgroups

- To understand the longitudinal and tissue-specific microbiome profile in vaginal samples, 111 adult female sex
- workers were enrolled in [...]. Among those, 14 were previously tested positive for HIV during the cohort's
- ₃₉ sampling procedure. [Describe here what was done and when, which samples, which tissues].
- 40 To be able to better undertand the differences in microbiome profile across all datasets collected, we performed
- 41 a joint graph-based clustering analysis in order to identify co-regulated bacterial communities (see "Methods"
- section for details). A total of 15 bacterial communities were identified.
- Noticebly, bacterial community NA consisted only of Lactobacillus species (**).
- Patients were thus subdivided into 8 groups,

129 4 Discussion

I have analysed data collected by Herman Bumpus³ on the relationship between sparrow (Passer domesticus) total length and surival following an unusually severe storm. I found that sparrows that died in the storm 131 were longer than sparrows that survived, which suggests that higher sparrow body length decreased survival. 132 Of course, it is not possible to definitively conclude a causal relationship between any aspect of body size and 133 sparrow survival, and even the available data collected by Bumpus would permit a more thoughtful analysis than that conducted in this study (see Appendix Table 1). Overall, this document demonstrates how high quality, professional looking documents can be written using Rmarkdown. The underlying code for this manuscript is publicly available, along with accompanying notes 137 to understand how it was written. By using Rmarkdown to write manuscripts, authors can more easily use 138 version control (e.g., git) throughout the writing process. The ability to easily integrate citations though 139 BibTeX, LaTeX tools, and dynamic R code can also make writing much more efficient and more enjoyable. 140 Further, obtaining the benefits of using Rmarkdown does not need to come with the cost of isolating colleagues who prefer to work with Word or LaTeX because Rmarkdown can easily be converted to these formats (in 142 the case of Word, with the push of a button). By learning all of the tools used in this manuscript, readers 143 should have all of the necessary knowledge to get started writing and collaborating in Rmarkdown.
